Administrator
Federal Territory

10. 9. 13

Sir

Re the above, This cottage would be very useful in connection
with the carrying out of the works, also the piece of land surrounding it which
is enclosed by a fence. This is one of the camping stages for Traction Engines
also Road Maintenance men. The engine drivers suffer considerable inconvenience
by having to carry tents and also to erect them, whereas, if this cottage was
made available it certainly would be very useful for engine drivers and road
maintenance men there being two fire places attached to the cottage which would
be most useful for cooking purposes, also saving a considerable volume of wood
that has to be carted, some distance, to this spot. The enclosed area around the
cottage would be very useful for keeping horses in that are being used in road
construction work close at hand.

Yours respectfully,

J. M. Williams
Clerk of Works
12/9/13
